VARUNRAJ'S VERMICOMPOST

Vermicompost, made from 100% original cow dung, is produced through the natural process of earthworms breaking down organic matter. This nutrient-rich compost enhances soil fertility and supports sustainable plant growth. It improves soil structure and provides an eco-friendly alternative to chemical fertilizers. Also useful for Hydroponic farming, also known as water culture or aquatic agriculture.

DOSAGE & APPLICATION OF VERMICOMPOST

1. All Types Of Fruits: 1kg/plant
2. Vegetable, Sugarcane: 1000kg/acre
3. Home Garden: 300-700 gm / per plant
4. Outdoor Plants: 200 gm - 250 gm per plant once in 30 days
5. Lawns & Planting Beds: 200 gm in to 400 gm in layer once in 2 months
